Skills

Team spirit and communication skills

Autonomy and rigor

Time management

Adaptability and energy

Development in C, Python, Go, Haskell, Bash, JavaScript and TypeScript

Web: HTML, CSS, Tailwind CSS, REST APIs, FastAPI

Databases: SQL, PostgreSQL

Tools and DevOps: Git, GitHub, CI/CD, Docker, unit testing, n8n

Systems: Linux, Unix system configuration, virtual machines

Cybersecurity: OWASP, CTF (OSINT, crypto, web, forensics, misc)

AI: AI agents and sub-agents, large language model (LLM) integration, prompt engineering

Education

01/2026 – present
Bachelor's in Computer Science, Year 1
EPITECH Benin | Cotonou, Benin

09/2024 – 2025
Bachelor's in Mechanical Engineering, Year 1
EPAC | Abomey-Calavi, Benin

09/2023 – 2024
Baccalaureate, Series E
Lycée Technique Coulibaly | Cotonou, Benin

09/2023 – 2024
Technical Diploma in Mechanical Manufacturing
Lycée Technique Coulibaly | Cotonou, Benin

Languages

English: Intermediate (B1)
French: Intermediate

FRANCK ASH PAOLO AVOCE

Information Technology Student

Profile

With a Series E baccalaureate and a technical diploma in mechanical manufacturing, I am studying for a bachelor's in computer science at Epitech Benin. I build web apps, data analysis tools and AI agents, such as EPILOT, a scheduling app deployed on Azure, and TARDIS, a model that forecasts train delays. I am looking for a two-month internship to work on real projects, learn alongside a team and strengthen my skills.

Projects

10/2026 – present
îlot (Personal Project)
EPITECH | Cotonou, Benin
A small island at the top of the Windows screen to follow your AI agents, answer their requests, read your messages and control your music.

07/2026 – present
EPILOT (Personal Project)
EPITECH | Cotonou, Benin
A web app that automatically pulls deadlines from the Epitech intranet and builds a personal study schedule for each student, based on their real timetable and study method.

07/2026 – present
EPYTODO
EPITECH | Cotonou, Benin
Task management REST API in TypeScript on Node.js and MySQL, with JWT authentication, plus a bonus web frontend that consumes the API.

09/2026
Janus Bob
lablab.ai | Cotonou, Benin
An IBM Bob 2.0 mode that keeps a repository true to its code, before and after every change.

08/2026 – 10/2026
Tardis
EPITECH | Cotonou, Benin
Train delay forecasting model in Python, trained on eight years of SNCF open data with scikit-learn, plus a bonus bilingual Streamlit dashboard to query the model.

07/2026 – 08/2026
Popeye & Chocolatine
EPITECH | Cotonou, Benin
Containerized environment with Dockerfiles and Docker Compose, and an automated continuous integration pipeline with GitHub Actions, following standard security practices.

Certifications

09/2026 — **Cybersecurity Fundamentals**, IBM SkillsBuild

09/2026 — **IBM Bob 2.0 Hackathon (certificate of participation)**, lablab.ai

Interests

Basketball, music, anime, video games.
